## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 8/18/2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date has been reviewed and is NOT accepted. The application/patent being disclaimed has not been identified.

### ***Response to Arguments***

2. Applicant's arguments filed 8/18/2003 have been fully considered but they are not persuasive. Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. Therefore, the rejection of the prior action are repeated below and made FINAL.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 38-94 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 and 33-37 of U.S. Patent No. 6,348,688. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 38-94 of the present application are anticipated by claims 1-27 and 33-37 of the '688 patent.

5. For example, claim 38 of the present application is anticipated by claim 25 (which depends from claims 1 and 21) of the '688 patent; claim 65 of the present application is anticipated by claim 2 of the '688 patent; and claim 90 of the present application is anticipated by claim 33 of the '688 patent. The dependant claims of this application are anticipated by the equivalent dependant claims of the '688 patent.
